Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 126, filed January 20th, 2004, with respect to claims 20 have been fully considered and are persuasive. The office action of page 15 has been withdrawn.

Claims 15, 18, and 20-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 14, 19, 31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasuhiko Patent No. JP05099581 in view of Shigenaka et al. US Patent No. 5,617,916.

Yasuhiko discloses the applicant's invention as claimed with the exception of providing slots that have flange free edges brazed to the tube runs.

Shigenaka discloses a fin tube heat exchanger that does provide slots that have flange free edges brazed to the tube runs. Therefore it would be obvious to modify Yasuhiko's invention by providing slots that have flange free edges brazed to the tube runs in order to improve the heat transfer coefficient.

Art Unit: 3743

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yasuhiko Patent No. JP05099581 in view of Scholl US Patent No. 3,687,194.

Yasuhiko discloses the applicant's invention as claimed with the exception of providing slots that are about 90 degrees to the direction of elongation of the fins.

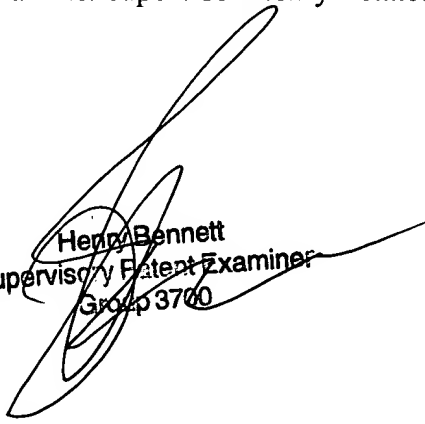

Scholl discloses ribbed pipe unit that does provide slots that are about 90 degrees to the direction of elongation of the fins. Therefore it would be obvious to modify Yasuhiko's invention by providing slots that are about 90 degrees to the direction of elongation of the fins in order to increase the heat transfer process.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
